Goldman Sachs

Global financial services giant Goldman Sachs announced an additional USD 10 million support to help India fight the surge in COVID-19 infections and deaths. Frontline health facilities include portable COVID-19 care centres, oxygen concentrators and generators, and isolation care units at homes for non-critical patients from low-income communities; adding funds will also be deployed on mental wellbeing to aid a faster economic recovery in communities.

"India is home to three Goldman Sachs offices, and we have a responsibility to respond and provide our firm's support and assistance," its chairman and chief executive David M Solomon said.

"We are proud to support India in combating this crisis, helping to augment its medical infrastructure and drive vaccination efforts," its chairman and chief executive for India, Sonjoy Chatterjee, said.

Google

Google & Googlers are providing ₹135 crores in funding to GiveIndia, UNICEF for medical supplies, organizations supporting high-risk communities, and grants to help spread critical information. This includes two grants from Google.org, Google's philanthropic arm, totalling 20 Crore INR (USD 2.6 million). The first is to GiveIndia to provide cash assistance to families hit hardest by the crisis to help with their everyday expenses. The second will go to UNICEF to help get urgent medical supplies, including oxygen and testing equipment, to where it's needed most in India.

"It also includes donations from our ongoing employee giving campaign — so far, more than 900 Googlers have contributed 3.7 Crore INR (USD 500,000) for organizations supporting high-risk and marginalized communities," Sanjay Gupta India's Google head said in a statement.

SAP

Last April, SAP established a [€3M COVID-19 Emergency Fund](#) to support organizations on the front lines, including the World Health Organization and CDC Foundation. Last week SAP [doubled its commitment](#) by adding another €3M for a total of €6M to the COVID-19 Emergency Fund with a focus on India. For this second phase commitment, SAP will donate €1M to [COVAX](#), an effort co-led by the Coalition for Epidemic Preparedness Innovations (CEPI), Gavi, the World Health Organization (WHO), and long-term SAP partner UNICEF, to accelerate fair and equitable access to vaccines for every country in the world. Beyond that donation, we will use the emergency fund to support India-based employees, their families, and the communities in which they live and work. This includes facilitating vaccinations to employees and their families at our SAP Labs India facilities and augmenting public health care systems with the aim to build additional provisions of oxygen supplies and ventilators.

Tata Steel

Tata steel has increased its daily supply of medical oxygen to health centres to 600 tonnes with increased logistics support.

TV Narendran, president-designate, CII, and CEO and managing director of Tata Steel, said,

“There is a dire need to increase the availability of oxygen and address the logistical issues in transporting oxygen across the country. The biggest bottleneck is the shortage of cryogenic containers. Tatas are importing 36 cryogenic vessels by this month-end. Tata Steel is also supplying over 600 MT medical oxygen from its plants to hospitals”.
